### PROFILE

Passionate Frontend Developer with over a year of experience working with HTML, CSS, JavaScript, and React. I am continuously expanding my expertise through engaging and creative projects. While I also have experience with PHP and MySQL, giving me full-stack development skills, I primarily identify as a web developer focused on creating dynamic and user-friendly websites.

### PROJECT EXPERIENCES

#### Socio-chat App

<https://chatapp-oyetech.free.nf>

- A fullstack project created with HTML, CSS, JavaScript, PHP and MySQL .
- Perfect database management
- Adding and uploading of profile picture which is also changeable
- Chat with people asynchronously and see when they are online

#### Facebook-Clone

<https://fb-clone-oyetech.netlify.app/>

- Full responsive Facebook UI clone with React JS and CSS
- Special features: Add a new post and picture
- Like features , increment and decrement while toggling click

#### Weather-App

<https://weather-app-oyetech.netlify.app/>

- Working with API and JavaScript to show the weather condition of any city in the world
- Showing the humidity percentage

#### Text-to-voice & Voice-to-text

<https://texttovoice-oyetech.netlify.app/>

<https://voicetotext-oyetech.netlify.app/>

- Worked with API and JavaScript for this achievement
- Write the text of your choice and get it read to you in specific voices
- Record your voice and the texts will be generated

#### W3school-Clone

<https://w3school-clone-oyetech.netlify.app/>

- A clone of a page of w3school with Tailwind CSS
- Responsive with dark mode features
